

## SUMMARY

Honors student with a 4.0 GPA and over 200 hours of volunteer service. Bringing hands-on experience as an Investigation Officer Intern, Security QA specialist, Web Developer, and Computer Support Assistant. Driven by a passion for AI, Cybersecurity, and Product Development, I am seeking opportunities to apply my skills post-graduation, with a focus on roles in the Chicago area.

## EDUCATION

### Illinois Institute of Technology | 2025

Master's Degree in Cyber Forensics and Security, 4.0 GPA, Dean's List, Transfer Leadership Scholar

### Illinois Institute of Technology | 2024

- CompTIA Network+
- uCertify CompTIA Linux+
- Essentials in Cybersecurity by Microsoft
- Essentials in AI by Microsoft
- Essentials in Project Management by Microsoft
- Illinois Community College Faculty Association Scholar
- President's Volunteer Service Award

## PROFESSIONAL EXPERIENCE

### Website Developer & Business Owner

#### Khan's Kreations | Mar 2020 - Present

I design and develop custom websites focused on responsive design and user experience. Key projects include:

- Qidwai Welfare Trust: Developed a website that helped raise \$20,000 for building 40 freshwater wells.
- BugmanPestControl: Created a website for a pest control company to enhance their online presence.
- Khan's Recipes: Created a family-owned recipe website showcasing traditional dishes.

I also manage my own professional website, showcasing my portfolio and expertise.

### Software Security QA Specialist

#### AmeriCloud Telecom Solutions | May 2024 - Nov 2024

- Conduct security-focused software testing and develop test cases to identify vulnerabilities and enhance cybersecurity resilience.
- Generate and manage tickets to document, track, and resolve security-related software issues efficiently.
- Collaborate with the development team to address security flaws, implement protective measures, and strengthen application defenses.
- Train and mentor interns on security testing methodologies, fostering a cybersecurity-aware testing environment.

### Investigation Security Officer Intern

#### Cook County Sheriff's Office | May 2024 - Aug 2024

- Leveraged CrowdStrike and Darktrace software to conduct comprehensive audits of search histories across all company devices, effectively identifying and mitigating unauthorized activities.
- Acquired in-depth knowledge of internet control systems and cybersecurity protocols implemented by the Sheriff's Office.
- Strengthened understanding of the Sheriff's Office's cybersecurity procedures and incident response protocols.

### Library Computer - Print Assistant

#### College of DuPage | Aug 2021 - Dec 2022

- Provided expert guidance to students on the use of printing, copying, and computing equipment.
- Demonstrated proficiency in diagnosing and resolving technical challenges, including troubleshooting various university software and hardware issues.
- Leveraged multiple communication platforms to create a welcoming environment while efficiently addressing and resolving technical problems.
