

SUMMARY

Highly organized and detail-oriented honors student with a 4.0 GPA and over 200 hours of volunteer service. Bringing hands-on experience as an Investigation Officer Intern, QA Intern, Web Developer, and Computer Support Assistant. Driven by a passion for AI, Cybersecurity, and Product Development, I am actively seeking opportunities to apply my skills in these areas post-graduation, with a focus on roles in the Chicago area.

PROFESSIONAL EXPERIENCE

Software QA Specialist

AmeriCloud Telecom Solutions | 2024 - Present

- Conducting product testing for upcoming company software.
- Creating detailed test cases to ensure comprehensive testing.
- Generating tickets to troubleshoot and uncover software issues.
- Collaborating with the development team to resolve identified issues and improve software quality

Website Developer & Business Owner

Khan's Kreations | 2020 - Present

I design and develop custom websites focused on responsive design and user experience. Key projects include:

- Qidwai Welfare Trust: Developed a website that helped raise \$20,000 for building 40 freshwater wells.
- BugmanPestControl: Created a website for a pest control company to enhance their online presence.
- Khan's Recipes: Created a family-owned recipe website showcasing traditional dishes.

I also manage my own professional website, showcasing my portfolio and expertise.

Investigation Security Officer Intern

Cook County Sheriff's Office | May 2024 - Aug. 2024

- Leveraged CrowdStrike and Darktrace software to conduct comprehensive audits of search histories across all company devices, effectively identifying and mitigating unauthorized activities.
- Acquired in-depth knowledge of internet control systems and cybersecurity protocols implemented by the Sheriff's Office.
- Strengthened understanding of the Sheriff's Office's cybersecurity procedures and incident response protocols.

Library Computer - Print Assistant

College of DuPage | 2021 - 2022

- Provided expert guidance to students on the use of printing, copying, and computing equipment.
- Demonstrated proficiency in diagnosing and resolving technical challenges, including troubleshooting various university software and hardware issues.
- Leveraged multiple communication platforms to create a welcoming environment while efficiently addressing and resolving technical problems.
